JOHOR BARU

**T**HE Caltex Fuel Your School community campaign is now in Johor.

Funds totaling RM210,000 have been allocated to public schools in Johor involving 42 projects which aim to enhance the learning of Science, Technology, English and Mathematics (STEM).

Chevron country chairman Jeremy Oh said, based on the success of the pilot project in Penang, phase two was expanded to schools in Johor and Kedah to empower teachers to execute innovative projects that help students to excel in core subjects.

"Caltex is built on innovation. Caltex Fuel Your School helps to provide future innovators with the resources they need to thrive.

"We urge educators to take this opportunity to fuel our children's competency in Science, Technology, English, and Mathematics to pave a brighter journey for them tomorrow," he said.

Endorsed by the Education Ministry, the organisers invited primary and secondary schools in Johor and Kedah to submit creative proposals requesting materials and resources of up to RM5,000 via [www.caltex.com.my/FuelYourSchool](http://www.caltex.com.my/FuelYourSchool) by June 18.

While Caltex will consider all types of educational projects, it encourages those that focus on STEM.

To encourage greater community participation, shortlisted classroom projects will be posted on the Caltex Fuel Your School Facebook page.

Projects will be awarded in phases, based on the highest number of Facebook "likes" received on reward days.

Funding will come from the Caltex Fuel Your School Fund — Caltex pledges RM1 for every purchase of RM40 or more at participating Caltex stations, up to a maximum of RM315,000 in July 2013.

The public may also contribute directly to classroom projects of their choice at [www.mykasih.com](http://www.mykasih.com) or

emailing [CaltexFYS@mykasih.com](mailto:CaltexFYS@mykasih.com). The project is organised in collaboration with MyKasih Foundation.

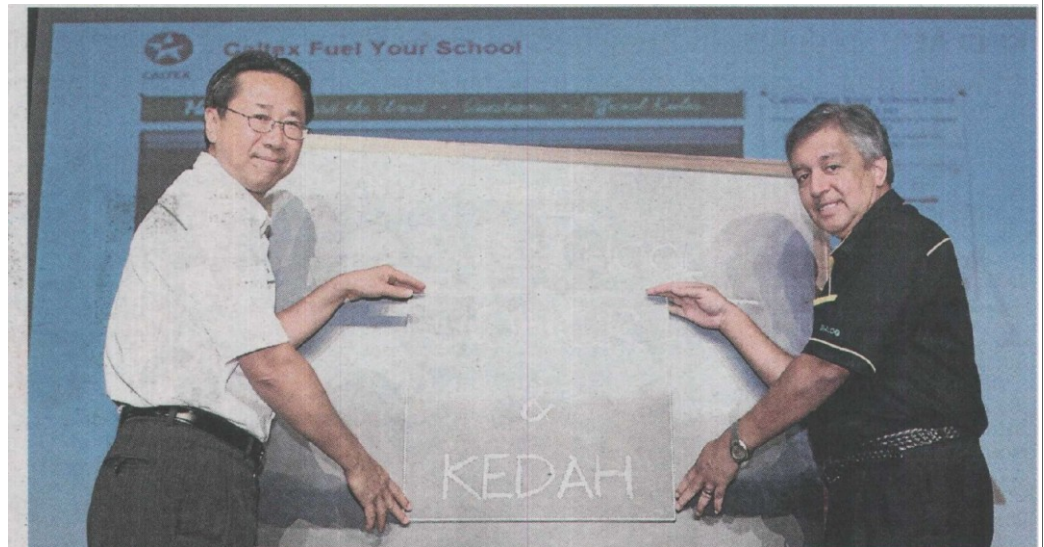

MyKasih Foundation chairman and co-founder Dr Ngau Boon Keat said the organisation was happy to be involved a project that created a nurturing environment for children to learn.

"We applaud our partner's innovative method in encouraging educators to come up with new learning programmes to promote the teaching of core subjects.

"This community initiative shows how everyone can help to make a difference and I hope this campaign's success will continue in the future," he said.

The campaign is part of Chevron's global Energy for Learning Initiative which partners with local communities, governments and non-profit groups to expand learning opportunities and supports the development of the social and economic vitality of these communities.
